Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich number of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

 - Shogun(RS)
 - Shogun(DS)
 - Shogun(PM)
- Set the goal**
 - Assess current global food production levels.
 - Identify trends and patterns in food production.
 - Evaluate the impact of climate change on food production.
 - Analyze food security and accessibility issues.
 - Explore sustainable practices in food production.

Define your problem statement

The Global Food Production Analysis project aims to comprehensively assess the current state of food production across the globe, identify key trends and challenges, and explore sustainable practices that can enhance food security and environmental sustainability. This project will leverage data analysis, stakeholder engagement, and innovative methodologies to provide actionable insights for policymakers, agricultural producers, and communities.

Problem

How might we explore sustainable practices that can enhance food security and environmental sustainability?

Key rules of brainstorming

To run an smooth and productive session

2 Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Tip
Add a sustainable logo to sticky notes to make it easier to find, remove, organize and categorize important ideas as themes within your model.
